

Corporate Express — no more ugly tile & grout

Corporate Express, Broomfield, CO, has beautiful “like new” tile and grout floors, reduced maintenance costs, and eliminated appearance problems and odors all because of the SaniGLAZE® restoration and maintenance process.

“I was looking to reduce cleaning time and time spent scrubbing,” said George Griego, facilities manager, Corporate Express. “Our janitorial contractor (JAY DEE Cleaning & Restoration) recommended the SaniGLAZE process for our restrooms, lobbies, locker rooms, showers, cafeteria and kitchens. The floors in all the areas where we’ve applied SaniGLAZE look cleaner and newer even though some of the floors are almost 10 years old,” Griego added.

What is SaniGLAZE?

SaniGLAZE is a proprietary restoration process that extracts embedded contaminants and odors from tile and grout surfaces, re-surfaces the grout with a nonporous glazing polymer, and

George Griego and Dana Griffin inspect their “like new floor” restored by SaniGLAZE.

shields the entire surface from direct contact with soil and contaminants. The result is a “like new” surface that is moisture-proof and easy to maintain since the porosity of the grout is eliminated. The process also eliminates the internal growth of mold and mildew. It can be completed in just a few hours and there are no construction headaches.

Finding a better way

“The tile floors are now clean with nightly mopping, and SaniGLAZE has reduced power scrubbing requirements by about 70 percent. I was able to cover the cost of the SaniGLAZE installation with the reduction in floor maintenance and the floors always look good,” said Dana Griffin, facility engineer. “The kitchen employees have commented that the floor looks much cleaner and is less slippery when wet. Management has seen the improvement and I was able to install SaniGLAZE in more areas,” Griffin added.

Griego and Griffin both commented about maintaining SaniGLAZE: “They also have a periodic maintenance program called EverGLAZE®. With the EverGLAZE program, my floors are maintained and kept to the high standards that I require for our corporate headquarters,” said Griego. Griffin added, “The EverGLAZE program has maintained the floors and they always look good.”

When asked about his overall feelings about SaniGLAZE, George Griego said, “It’s a product that you can trust, a product that will save you money in the long run, a product that will bring out the best in any tile flooring, and a product that will create a sanitary environment.” Dana Griffin added, “I am very satisfied with the product. If building owners maintain their tile floors like they should, then SaniGLAZE will pay for itself in maintenance savings and improve the overall look of their tile floors.” □
